store of Ed. Hoffschlaeger & Co. yesterday. We THE BARE COMET sailed for San Francisco on

Monday, taking the mails, a full freight and three passengers. With the southerly winds, which will sechably soon carry the Comet out of the region of worst, the trades, we may recken upon her making a good trip over. COLD WEATHER - Sunday and Monday nights of

lawest for the season has been 60".

Collision .- On Saturday morning, a carriage driven up Nauanu street at a rapid rate, came in contact with a horse loaded with produce that was standing at the corner of Hotel and Nunanu Streets, me of the shafts of the carriage penetrating the body of the animal and causing its death in a short time. The owner of the horse and the driver of the carriage were both to blame.

Reports to the contrary notwithstanding, we passed off with the utmost good feeling; and the rival candidates, the elected and defeated, are on the same good terms that they have been for years past. Like the election at Honolulu, sithough there was any amount of electioneering among the partisans of the different candidates, they kept themselves very quiet, being merely interested spectators.

THE VOLCANO.-From parties who visited the volcano, on the recent trip of the Kilanea to Hilo, we learn that although there are no lakes of lava in ciensions of no mean character, independent of the awe inspiring scenery which surrounds them. Some of these cones, small mountains in themmelves-are constantly emitting from their cavernous mouths molten have, which is projected into the air above the summit of the cose a hundred and fifty or by Pele is said to be magnificent in the extreme.

Benotany.-- During the night of Wednesday last, the liquor store of Mr. Frank Brown was enternd and a quantity of liquors stolen. The store was opened through the back door, by means of a board being pried off sufficiently to allow the fastening on the Inside of the door to be reached. Some one evidently well acquainted with the premises has "gone back" on the establishment, which does not appear to be a matter of so much surprise as the fact that it has not been attempted before. The burglaries recently committed, have probably all been by persons well acquainted and perhaps connected with the various premises, the successful manner in which they have been perpetrated in nearly every instance being a proof that they were not the work of stran-

CAURLESSNESS.-During the last trip of the Kilunes, after leaving Kawaihae for Hilo, a number of letters were found under one of the transom-cushions in the cabin, where they had probably been put by some careless individual before leaving Henolulu. They were all stamped and addressed to parties at Kawaline and Waimea, and had they been placed in the stemmer's letter-box, they would have gone the stemper's letter-box, they would have gone used on important occasions, and when it sounds, a ashere with the others. The letters were taken in deep, bollow sound vibrates through all Moscow, charge by the purser and sent overland from Hilo like the fullest tones of a vast organ. The bell is to their destination, where they arrived after a great suspended in a tower called the belfry of St. Ivan, deal of delay. No one is to blame but the parties and beneath it are others, less in size and yet enerinterested in the letters, who, if they were unable to mous. It is 45 feet 9 inches in circumference, 16% forward them in the mail, should have put them in feet high, and weighs more than 47 tons. The great the letter-box on board instead of giving them to | bell of Moscow, known to be the largest over foundsome one clie to do so, as was probably the case. | cd, lay for many years in a deep pit in the midst of | was experienced in landing her cargo, (which had to | Bible Coal Tar., The turner of the steamer is often appoved by persons giving him charge of letters just as the vessel is ready to start, when his time is occupied by other | will not allow a grain of it to be filed off; but the matters; whereas, if they were put in the letter-box, | Czar Nicholas caused it to be removed and placed | Commany, hence Oct. 1st, arrived at Nagasaki, Japan, which is opened and the letters sorted for the varione ports after leaving here, it would save a great a chamber. The size of the room is 28 feet in diam-

ALARM OF FIRE -- An alarm of fire in the fourth ward was struck at the bell-tower on Saturday morning. It was caused by the cook-house adjoining the residence of Mr. Humphreys, on the lane off Emma Street, opposite the Square, taking fire. Mr. James the time, immediately started out with the "jumper" and got a stream of water on from the hydrant in the Square, when Engine Co. No. 1 arrived, but the fire was extinguished without their assistance by persons belonging to the premises. It will perhaps be interesting to the members of the Fire Department, and every one else, to learn that the fire was extinguished by means never before heard of, if we are correctly informed by Saturday's paper, which reports that it was extinguished with "two buckets of fire,"-probably a substance similar to that contained in the wooderful "Summerfield Vial," an account of which was given in that journal some time since. It is not at all surprising that a fire should

THE STORY OF LITTLE DOMBEY .- We regard the above reading on Thursday evening last, to have been the most successful of Mr. Geo. Pauncefort's series of Dickons' presentations excellent though the others have been. There was such a truthful, and natural blending of the humorous and pathetic, as the variety of incidents came into notice, while the charming simplicity, and old fashioned reasoning of little Paul, were so artistically delineated, that many of the andience felt the tear of sorrow glisten in their eyes, as the dear little child's spirit drifted out into the ocean that rolls around the whole world. It requires more than ordinary talent to be enabled to represent these stories with fidelity, and yet preserve the continuity of interest. Mr. Pauncefort always appears to enter with nest and skill upon his subject, throwing in the delication of light and shade so visidly which evidences the decided genius of the student, while it evinces the full practicality of the interpreter. It is impossible to receive a better lesson, the sweet spirit of christianity and every cardinal virtue permeates the whole series, while there is plenty of comic reality to keep one pleased and excited. Mr. Pauncefort left for the other irlands yesterday, where we trust be may be se successful as his ability merits. We shall be pleased to receive him again amongst us.

GOOD TEMPLARS. - At a regular meeting of Ultima Thule Lodge, No. 1, held on Saturday evening last, the following officers were elected for the ensuing term: M. McIseroy, W. C. T.; Miss Elizabeth Brush, W. V. T.; Geo. W. Norton, W. S.; A. D. Bolster, W. F. S.; Geo. H. McConnell, W. T.; D. Stewart, W. M.; Wm. Clark, W. I. G.; W. Peterson, W. O. G.; Thue Tannatt, W. C.; B. F. Gibbs, W. R. H. S.; Mrs. Thos. Tanuatt, W. L. H. S. These officers were publicly installed by the Lodge Deputy last evening, at the Lodge room on King street, in the presence of a large and interested audience.

-At a regular meeting of Queen Emma Lodge, No. 2, beid on Monday evening last, the following officers were elected: Jas. W. McGuire, W. C. T.; Mrs. H. L. Sheldon, W. V. T.; Henry Smith, Jr., W. S.; Wm. B. Wright, W. F. S.; John L. King, W T. Wm. B. Mason, W. M.; Miss Sophia L.

Sheldon, W. I. G.; Samuel W. Pogue, W. O. G. -Honolulu Lodge, No. 5, held their election for officers on Tuesday evening last, as follows: Samuel Stains, W. C. T.; Mrs. R. Rodonet, W. V. T.; E. Harrison, W. S.; W. G. Poole, W. F. S.; Geo. Lucas, W. T.; R. Sands, W. M.; Manuel Williams, W. L G.; R Crane, W. O. G.; R. Bycroft, P. W. The officers of the several lodges were installed at the rooms of Ultima Lodge, on Friday evening last.

Probable Sudden Rise in Cold!-Suspension of Business !- Panic in Erie Stock, and a Universal Depression of Business in the Monied and Aristocratic Circles in Europe and the United States, upon Arrival of the Bark Comet at San Francisco!-Oh, My!

That tremendous seven-by-nine sheet, the Semi-Weekly Advertiser, startled its readers yesterday with the announcement that on Monday, (Election day,) "At 12.30 P. M. we were so confident of the result, that we sent by the Comet a dispatch to the Associated Press, announcing the triumph of the Inde-A very fine lot of staple goods were sold at the pendent Party." (!!!) We pause with awe and heard of great burgains being made by dealers. The forebodings of the most frightful character as to the sale will be continued to-morrow, Thursday, when effect this portentous automorement will have upon

a fire and well assorted lot of staple goods will be the "Associated Press" and the world at large. We apprehend the most serious consequences, and advise our readers, particularly those who do not belong to the Independent Party, to prepare for the

BUGGY ACCIDENT .- One evening last week, while Mr. Bradley was driving with a couple of friends in his buggy, they were thrown out in turning the corthis week have been among the goldest experienced her of Nunanu street into Queen, by the buggy giv-here during the senson. On Monday morning the ling a sudden lurch. Mr. Bradley, who had the reins, thermometer at Capt. Smith's place at Waikiki, was thrown first, followed by the others, all of stood at 61', on Tuesday morning at 62' Fahr. The whom were severely bruised. The animal being free of all control, started off at a furious rate, and would doubtless have caused considerable injury to itself and the buggy, but for the courageous exertion of an individual who met and stopped the runaway near the corner of Onces and Fort streets.

OLD ANVILS - In a descried shop in Pittsfield, Museachusetts, there rests on its block an anvil that has done duty for more than three hundred years. It is as sound to-day as it was in 1633, when Eitwood Pomerny, after welding for the Stuarts the are enabled to say that the election at Koolanpoko | ponderous borse-shoes of the same style and pattern that his ancestors had made during many generations for the Tudors and the Plantagenets, grew weary of taxes without law and work without wages, and taking his anvil, sailed for the New World. A deft workman, he throve in the settle ments, and left his anvil as an heir-loom to his lescendants. They show you in the town of London the anvil on which the sword was forged that Richard Cour de Lion wed in his famous contest with Saladin. At the collection of Pompelian antiquities in Naples there is an anvil, made certainly Klisnes there are numerous cones which are of before the Christian ers, which had evidently done themselves active volcanoes. Some of them have service for the stalwart workmen of many generations before the city was buried. But, better still, in the Egyptian room of the British Museum, there is a veritable anvil of the Pharaohs.

THE GREMAN EMPIRE. - The money required to carry on the German Empire during the year 1872, two hundred feet. The exhibition now presented | it is stated, amounts to \$88,400,000. The estimates of the appropriations for the separate States amount to \$205,000,000 for the public expenditure of Germany. The Federal outlay of \$88,400,000 is covered by the customs duties and certain indirect taxes, and the direct contributions of the Individual States. The regular income of the Federal Tressury is from the following sources: Customs, \$20,000,000; beer excise, \$2,560,000; spirit excise, \$8,240,000; sait excise, \$8,400,000; beet-root angur excise, \$9,000,000; Post-office profits, \$2,400,000; railways in Alsace-Lorraine, \$2,400,000; war indemnity, \$5,816,000; navy loans, \$977,600; stamp duty on bills of exchange, \$1,080,000; contributions of the German States not included in the Zollverein, \$854,400; and profits on the telegraph service, \$4,800. These items amount to \$62,332,800, leaving \$25,007,200 to be contributed by the various States. Of the expenditures, \$72,000,000 are appropriated to the army, and \$4,000,000 to the navy. The latter sum, it is stated, will merely allow the Government to continue the works just commenced at the ports of Kiel and Jahde, and increase the navy at a moderate rate.

> BELLS IN THE OLD COUNTRIES.-The numberless bells of Moscow are kept constantly ringing during Easter week, tinkling and tolling without order or regularity. The large bell near the cathedral is only the Kremlin, and is truly a mountain of metal. The natives regard it with a religious veneration, and | bay since her arrival. eter, and 22 feet 1 inch in height.

The bells in China rank next in size to those in Russia. In Pekin, it is stated by Father Le Compte, there are seven bells, each weighing 120,000 pounds. Excepting the bells cast for the new Houses of Parliament, the largest of which weighs fourteen Street, opposite the Square, taking fire. Mr. James
McGeire, ex-foreman of Engine Co. No. 2, and one of
two other members who were at the engine house at
only 7 feet 7 inches in diameter. The great Tom only 7 feet 7 inches in diameter. The great 1 om of Oxford weighs 17,000 pounds, and the great Tom of Lincoln 12,000 pounds. The bell of St. Paul's, in London, is 9 feet in diameter, and weighs 17,500 pounds. One placed in the Cathedral of Paris, in 1805, weighs 37,000 pounds. Another in Vienna, cast in 1711, weighs 40,000 pounds. The famous ball cathed Secretary of Error is considered to bell called Susample of Erfurt, is considered to be the finest bell metal, containing the largest propor-tion of silver; its weight is 30,000 pounds, and it

HONOLULU, FEB. 6, 1872. The weather throughout the Islands appears to be favorable for the taking off of the sugar crop-if we break out in a neighborhood where it is kept in except the Hilo District, the Plantations of which are in want of water for working their machinery. We are having more than the usual amount of light southerly winds for this reason, which interferes somewhat with the coasting business, and keeps produce

> The bark Comet sailed yesterday, taking a full cargo of domestic produce, valued at \$26,000. The schr. Sovereign sailed to-day for Tahiti, via

> Kawaihae, taking a cargo of cattle. To-day, Bartow held an auction sale at the store of Mesers, Ed. Hoffschlaeger & Co.; the goods offered were of the best description, and terms liberal. The

sale will be continued on Thursday next. We notice that coasters are carrying away large freights to the other Islands, aside from the containers, &c., required for the plantations, showing that our jobbers are doing well in a quiet way.

The Hawaiian bark Queen Emma, with ordinary passage, ought to be here during the week, and a schooner is also due from San Francisco. The Nebrasks will be due from Anckland on the 11th, and several sailing vessels are now fully due from Europe,

SHIPPING NEWS.

Schooner Patani-Had light southerly weather three days after leaving port Jan. 18th, and tooks heavy S.W. gale off the south end of Hawaii on the 21st, which continued with great severity until the evening of the 23d, the vessel being hove-to under close-reefed foresall during the gale. On the morning of the 24th off Waiohinu, a large water-spout burst within three miles of the schooner, throwing immens quantities of water to a great distance. All the ports visited along the coast had received great damagfrom the gale, during which a tidal wave at Kapua swept everything along the shore. Had light weather until the 1st inst. and took a strong sou'wester in the Hawaii Channel; hove-to under the north side of Onhu until the evening of the 2d, when it moderated, and thence to port light weather, arriving next morning after a trip of fifteen days.

ortherly weather which continued until crossing the Hawali Channel, then fresh trades with smooth see until after leaving Kawaihae; arrived at Hilo the 26th at 9 a.m. and landed passengers, but was unable to land freight until the fourth day, owing to the heavy swell in the bay creating a dangerous surf at the landing; left at 4 p.m. on the 29th, and had favorable weather at all other ports on Hawaii; had fresh S.W. winds on return trip neross the Channel and anchored off Makee's Landing the evening of the 1st inst. and landed passengers, the weather squally with a heavy swell : during the night the wind increased to a cale. and the swell causing the steamer to plunge bows under, rendering it dangerous to remain longer at anchor, got underway at 4 o'clock next morning without taking off passengers or freight; arrived at Lahains at 8 a.m. but was unable to take off freight ow ing to a heavy surf breaking at the landing; left at 5 p.m. for Honolulu, the weather moderating during the passage, and arrived next morning at daylight, having been absent nine days on the trip.

THE MAIL STEAMERS.-The steamer Mohongo (which visited this port a few years since when a U. S. war vessel) is expected from San Francisco in place of the Moses Taylor. It was reported by last mail that the next steamer would leave upon the arrival of the English mails, but it is not likely that she would sail before the 2d instant, the date which the Moses Taylor probably arrived over. The Nebrasks is not due before the 16th, (the average trips of the Australian steamers being fifty-four days) unless she makes quicker time than usual, to make up for the delay in leaving here on the outward trip.

During the recent southerly gale, portions of a wreck were washed ashore along the Maul coast beyoud Makee's Landing, consisting of part of a ressel's bow and stern, and a bowsprit. It is supposed to be part of the wreck of the Kate Lee, that was lost in November last at Onomea, Hawaii, as the bowsprit corresponds with the one belonging to that vessel, and the other portions of the wreck being similar to those of a vessel of her size. The bark Atalanta has received extensive repairs

since her arrival at this port, which would have been completed much sooner but for the delay caused by recent southerly storm. She is bound to Sydney in ballast and will sail on Saturday or Monday next, counciling at the Navigator Islands. The Atalanta is council in San Francisco, netwithstanding the report SHORTLY EXPECTED that she has recently become a North-German ves-

the Sound from that port in ballast, and was expected to sail about the 3d inst. Considerable difficulty The Russian steam-corvette Izoumroud, Com'der

upon a granite pedestal. It has been consecrated as Nov. 5th; the Russian frigate Vetias, flagship of Admiral Feederofsky, arrived from Guam on the 11th. The German clipper bark Hongkong, hence Oct. 16th, arrived at Yokohama Nov. 19th. The British bark Gerstang and Hawalian bark Ka

Moi are both considerably overdue from European ports. The latter vessel has already made several very successful voyages to this port, the present one offered by any other party, by

BOLLES & CO being the first that has occupied over 120 days on the outward passage. The clipper ship Matchless, of Macondray's China

Line, was expected to leave San Francisco Jan. 18th, -nine days after the departure of the last steamerand will probably touch at this port with a mail, en route for Hongkong. The British brig Susan, with her outfits, will be

sold at public auction on Saturday next, to satisfy a mortgagee's claim against ber. The vessel is in complete order and ready for sea. The Hawaiian bark Queen Emma will be due from

San Prancisco about the 12th inst. She is now fortyone days out from here, and probably arrived over about the 15th ult.

The schooner Sovereign for Tahiti, having been detained several days by southerly weather, sailed for that port yesterday via Kawaline, where she will load with cattle.

The schooner C. M. Ward is expected to sail tomorrow with laborers and supplies for the Guano Islands, and also the brig Robert Cowan for Victoria.

DIED.

HUSBANDS—At Kalwiki Plantation, Illio, Hawaii, January, 20th, 1872, the wife of R. V. Rusbonds, in the 29th year of her age. [San Francisco papers please copy.]
